003 - BACKGROUND

Pedernales Electric Cooperative, Inc. ("PEC") is a private electric utility owned by the members we serve. On behalf of our member/owner community, PEC is an industry-recognized leader providing outstanding service and reasonably priced electricity to homes and businesses for more than 80 years. We service more than 300,000 meters in twenty-four counties in Texas. Our Headquarters is located in Johnson City, Texas. PEC has offices located throughout its service area.

PEC's operational commitment is to provide reliable electricity and excellent service to members at competitive prices and to guide responsible stewardship of our resources and provide a rewarding, fair, and safe work place for our employees. As a cooperative, PEC is owned by the "members" it serves. Members—not stockholders—invest in the Cooperative through their electric billings and share in the Co-op's margins. Because of this unique business model, PEC members demand the best service, reliability, and management.

PEC has dielectric oil filled equipment located throughout its service territory. PEC is searching for vendors able to provide timely, turnkey emergency response services for spill cleanup and remediation in order to comply with environmental regulations and reduce operating costs. Spill response and remediation services include excavation, transportation and disposal of impacted soils.

PEC's Environmental Department through this request for proposal ("RFP") seeks proposals ("Proposals") from qualified persons or entities ("Respondents") interested in providing timely, turnkey spill response and remediation services for PEC encompassing the entire service territory, or as much of the service area as possible.

004 - SCOPE OF SERVICE

The Respondent's RFP response must include the necessary labor and other associated services to develop the following scope and deliverables.

Pedernales Electric Cooperative, Inc. (PEC) has dielectric oil filled equipment including but not limited to transformers, capacitors, reclosers, regulators and switchgear located throughout its service territory. The mineral oil amounts vary on the type of equipment and generally contain from 5 to upwards of 6000 gallons. Occasionally spills occur from this equipment and remediation is necessary. Fuel and hydraulic spills from vehicles and/or chemical spills at warehouses or yards could occur and may require cleanup. The amount of spill response calls vary (and are not guaranteed), however vendors are needed with quick response times when such emergencies do occur.

PEC is undertaking a company-wide Spill Response and Remediation effort in order to reduce operating costs and continue to ensure environmental compliance is met.

The goals of this RFP are to have vendors in place that are able to provide fast, turnkey spill response and remediation services to PEC in order to have an efficient process of dispatching cleanup crews, and reduce costs on remediation procedures. The goals are to be met by having a streamlined, turnkey service in place.
